

IRO Certificate #4599

NOTICE OF INDEPENDENT REVIEW DECISION

October 10, 2002

Re: IRO Case # M2-02-1181-01

Texas Worker's Compensation Commission:

___ has been certified as an independent review organization (IRO) and has been authorized to perform independent reviews of medical necessity for the Texas Worker's Compensation Commission (TWCC). Texas HB. 2600, Rule133.308 effective January 1, 2002, allows a claimant or provider who has received an adverse medical necessity determination from a carrier's internal process, to request an independent review by an IRO.

In accordance with the requirement that TWCC assign cases to certified IRO's, TWCC assigned this case to ___ for an independent review. ___ has performed an independent review of the proposed care to determine if the adverse determination was appropriate. For that purpose, ___ received relevant medical records, any documents obtained from parties in making the adverse determination, and any other documents and/or written information submitted in support of the appeal.

The case was reviewed by a physician who is Board Certified in Anesthesiology and Pain Management. He or she has signed a certification statement attesting that no known conflicts of interest exist between him or her and any of the treating physicians or providers, or any of the physicians or providers who reviewed the case for a determination prior to referral to ___ for independent review. In addition, the certification statement further attests that the review was performed without bias for or against the carrier, medical provider, or any other party to this case.

The determination of the ___ reviewer who reviewed this case, based on the medical records provided, is as follows:

History

This case involves an elderly lady with left wrist pain after injury in ___. Carpal tunnel surgery was performed in 1996. Now the patient has neck/shoulder/arm pain and has a diagnosis of RSD.

Requested Service

Behavioral based pain management program

Decision

I agree with the carrier's decision to deny the requested treatment.

Rationale

There is no evidence in the documentation submitted that RSD is present. The patient has had physical therapy. There is no evidence in the documentation submitted that antidepressants have been prescribed. A PT/behavioral program is not reasonable and necessary since the patient has had physical therapy and has not had antidepressant therapy. The patient's symptoms appear to be consistent with degenerative changes related to age.

This medical necessity decision by an Independent Review Organization is deemed to be a Commission decision and order.
